PROFESSIONAL SUMMARY

Technical Engineer and Universitas AMIKOM Yogyakarta graduate combining solid network engineering fundamentals with production frontend theme delivery and autonomous AI systems. Fully certified across the **Cisco CCNA Trilogy (ENSA, SRWE, ITN)** and **Cisco Network Security**, with verified competitive success as **2nd Place Winner at Digination Fest 2024 National Networking Competition** (Dirkominfo PPI Dunia). Experienced in agency environments at **Nozaracy Studio** executing full-cycle delivery playbooks (Discovery to bespoke WordPress PHP & Shopify Liquid implementation, responsive QA, and Core Web Vitals audits), alongside hands-on enterprise IT infrastructure operations at **PT Sangsaka Surya Karunia**. Proven capability in engineering autonomous security agents and AI pipelines (LangGraph, Docker containerized tools, Amazon Bedrock, GraphRAG), maintaining strict architectural rigor and high production standards.

TECHNICAL SKILLS & COMPETENCIES

Networking & Infrastructure:	Cisco IOS, Routing & Switching (OSPFv2, Multi-VLAN, STP, EtherChannel), Cisco ASA Firewall, Site-to-Site IPsec VPN, Zone-Based Policy, Enterprise Hardware Diagnostics, TCP/IP, Subnetting.
Security & Pentesting:	Network Vulnerability Assessment, Offensive/Defensive Tooling (Nmap, Nuclei, Ffuf, Sqlmap), Access Control Lists (ACLs), AAA, CTF Challenge Solving, Docker Containerized Tool Isolation.
Web & Theme Engineering:	Custom WordPress (PHP Theme Dev, Hooks/Filters), Custom Shopify (Liquid Theme Dev, Sections/Blocks), Semantic HTML5, CSS3, Modern JavaScript (ES6+), Figma Token Mapping, Core Web Vitals (LCP, CLS, INP) Optimization.
AI & Systems Architecture:	Python, LangGraph StateGraph, Multi-Agent Orchestration, Amazon Bedrock Multi-Model Routing, GraphRAG 3-Tier Memory (Qdrant, Neo4j, PostgreSQL), Celery Workers, Docker Containerization, IndoBERT NLP.
Developer Tools & QA:	Git/GitHub, Linux/UNIX, Bash Scripting, Postman, Playwright Automation, Cross-Browser & Multi-Viewport Responsive QA Testing.

WORK & PROJECT EXPERIENCE

Theme & Frontend Engineer · Nozaracy Studio (Agency)

Freelance · Present | Remote

- Executed full-cycle client delivery playbooks spanning **Discovery** (Figma token mapping & component architecture), **Implementation** (bespoke WordPress PHP & Shopify Liquid themes), **QA**, and **Final Audit**.
- Engineered custom WordPress and Shopify themes from scratch with 0% page-builder bloat, guaranteeing clean semantic markup, modular codebases, and maintainable template structures.
- Utilized modern AI-accelerated developer pipelines for rapid component scaffolding, schema synthesis, and automated test-case generation, reducing production turn-around time.
- Conducted multi-viewport cross-browser QA and Core Web Vitals performance tuning, consistently achieving 90+ Lighthouse performance scores across LCP and CLS prior to client handoff.

AI Security & Autonomous Systems Engineer · Zandar Platforms

Freelance · 2026 | Remote

- Architected **Zandar AI**, an operator-controlled autonomous pentest system using LangGraph StateGraph, orchestrating 18+ containerized security binaries in isolated Docker runtime containers.
- Implemented **Amazon Bedrock Multi-Model Routing** (Claude 3.5 Sonnet / DeepSeek / Qwen) with human-in-the-loop exploit authorization gates to ensure strict operational safety and token cost optimization.
- Engineered **GraphRAG 3-Tier Memory** integrating Qdrant (vector similarity), Neo4j (attack path & infrastructure topology), and PostgreSQL (audit logs & execution states).
- Developed **Zandar OSINT** intelligence pipeline featuring 26 ingestion adapters, Celery async workers, and fine-tuned IndoBERT NLP model achieving a benchmark **0.894 F1 Score** on NusaX-Senti.

Support Technician · PT Sangsaka Surya Karunia — 2020 – 2021 | Yogyakarta, Indonesia

- Delivered hands-on enterprise IT support, hardware diagnostics, and workstation deployment across commercial office environments.
- Resolved multi-VLAN network connectivity issues, switch port configurations, and peripheral hardware failures under operational time constraints.
- Maintained structured asset logs, performed preventative hardware maintenance, and trained end-users on workplace security protocols.

Cybersecurity Division Member · HIMMTEK Universitas AMIKOM Yogyakarta — 2024 – 2025 | Yogyakarta, Indonesia

- Participated in internal vulnerability research workshops, Capture-The-Flag (CTF) challenges, and hands-on offensive security labs.
- Assisted in organizing academic tech talks, knowledge transfer sessions, and network defense simulations for student members.
- Credential verified under official student association decree No. 1337/S-KMHS/AMIKOM/VI/2025.

EDUCATION

Universitas AMIKOM Yogyakarta — Yogyakarta, Indonesia
Bachelor of Computer Engineering (S1 Teknik Komputer) · NIM: 22.83.0886 — 2022 – 2026 (Graduate)

SMK Negeri 1 Pleret — Bantul, Yogyakarta
Vocational Diploma in Computer and Network Engineering (Teknik Komputer dan Jaringan / TKJ) — 2018 – 2021

FEATURED ENGINEERING PROJECTS & SYSTEM ARCHITECTURE

Deep-dive into production codebases, multi-agent frameworks, and bespoke theme engineering.

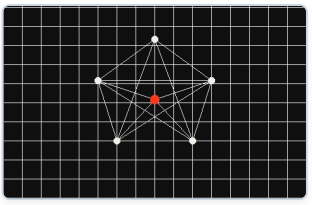

PROJECT SHOWCASE ADDENDUM

1. Zandar AI — Autonomous AI Security & Multi-Agent Pentest Platform

AI CYBERSECURITY · MULTI-AGENT SYSTEM

An autonomous, operator-supervised cybersecurity engine designed to run end-to-end vulnerability assessments and authorized penetration testing loops. Built on a modular **LangGraph StateGraph** architecture that coordinates **18+ containerized security binaries** (nmap, nuclei, ffuf, sqlmap, httpx, naabu, subfinder, hydra) isolated inside secure Docker runtime containers.

Features **Amazon Bedrock Multi-Model Routing** (Claude 3.5 Sonnet for tactical attack graph synthesis, DeepSeek/Qwen for script generation), backed by a **3-tier GraphRAG long-term memory** (Qdrant vector similarity + Neo4j infrastructure attack path graphs + PostgreSQL execution traces) with strict **human-in-the-loop exploit authorization gates**.

`Python` `LangGraph` `Docker (18+ Binaries)` `Amazon Bedrock` `GraphRAG (Qdrant+Neo4j)` `FastAPI` `Human-in-the-Loop`

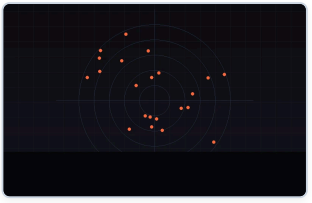

Source Code Repository: `github.com/Fenrir717/AI-Pentest-Platform`

2. Zandar OSINT — Multi-Tier Open-Source Intelligence & Verification Engine

DATA ENGINEERING · NLP INTELLIGENCE

An enterprise-scale open-source intelligence aggregation and fact-checking platform. Implements **26 ingestion data adapters** across 3 tiers (RSS feeds, GDELT global events, YouTube Data API, Google Play Store reviews, public Telegram channels, and Wayback Machine digital archives) running on a distributed **Celery & Redis** worker cluster.

Includes a custom fine-tuned **IndoBERT NLP sentiment & classification model** achieving a benchmark **0.894 F1 Score** on the NusaX-Senti gold dataset. Integrated with an automated claim verification pipeline that cross-references extracted claims against official government datasets (BPS & BMKG) for high-confidence intelligence synthesis.

`Python` `26 Data Adapters` `IndoBERT (0.894 F1)` `Celery Workers` `Redis` `PostgreSQL` `BPS/BMKG Verification`

Source Code Repository: `github.com/Fenrir717/Zandar-OSINT-Intel`

3. Nozaracy Studio — Figma to Shopify & WordPress Bespoke Theme Engineering

THEME ENGINEERING · WEB PERFORMANCE

Full-cycle bespoke theme engineering agency playbook delivering high-performance e-commerce and corporate websites. Translates complex Figma design tokens into clean, modular, and maintainable codebases for both **WordPress (PHP theme architecture, hooks, custom post types)** and **Shopify (Liquid theme architecture, custom sections, blocks)** with **0% visual page-builder bloat**.

Leverages modern AI-assisted workflows for rapid component scaffolding, schema synthesis, and automated test-case generation. Rigorously verified via automated multi-viewport QA (Playwright) and deep **Core Web Vitals** optimization, consistently securing **LCP < 2.0s, CLS 0**, and **90+ Lighthouse Performance** prior to client delivery.

`Figma Token Mapping` `WordPress (PHP)` `Shopify (Liquid)` `Core Web Vitals (LCP/CLS)` `Lighthouse 90+` `Playwright QA`
