MUHAMMAD NUR HAQIQI

IT Infrastructure Engineer · Frontend & Theme Engineer · AI Security Specialist

Location: Yogyakarta, Indonesia **Email:** hakiki2917@gmail.com **GitHub:** github.com/Fenrir717

Portfolio: Portfolio Web (Live) **English Proficiency:** TOEFL Prediction: 453 (Intermediate)

PROFESSIONAL SUMMARY

Technical Engineer and Universitas AMIKOM Yogyakarta graduate combining solid network engineering fundamentals with production frontend delivery and autonomous AI systems. Fully certified across the **Cisco CCNA Trilogy (ENSA, SRWE, ITN)** and **Cisco Network Security**, with verified competitive success as **2nd Place Winner at Digination Fest 2024 National Networking Competition**. Experienced in agency environments at **Nozaracy Studio** executing full-cycle delivery playbooks (Discovery to bespoke WordPress PHP & Shopify Liquid implementation, responsive QA, and Core Web Vitals audits), alongside hands-on enterprise IT infrastructure operations at **PT Sangsaka Surya Karunia**. Skilled in leveraging AI-augmented developer workflows as a force multiplier for rapid scaffolding and automated test synthesis while maintaining strict architectural rigor.

TECHNICAL SKILLS & COMPETENCIES

Networking & Infrastructure:	Cisco IOS, Routing & Switching (OSPFv2, Multi-VLAN, STP, EtherChannel), Cisco ASA Firewall, Site-to-Site IPsec VPN, Zone-Based Policy, Enterprise Hardware Troubleshooting, TCP/IP, Subnetting.
Security & Pentesting:	Network Vulnerability Assessment, Offensive/Defensive Tooling (Nmap, Nuclei, Ffuf, Sqlmap), Access Control Lists (ACLs), AAA, CTF Challenge Solving, Containerized Tool Isolation.
Web & Theme Engineering:	Custom WordPress (PHP Theme Dev, Hooks/Filters), Custom Shopify (Liquid Theme Dev, Sections/Blocks), Semantic HTML5, CSS3, Modern JavaScript (ES6+), Figma Token Mapping, Core Web Vitals (LCP, CLS, INP) Optimization.
AI & Systems Architecture:	Python, LangGraph StateGraph, Multi-Agent Orchestration, Amazon Bedrock Multi-Model Routing, GraphRAG 3-Tier Memory (Qdrant, Neo4j, PostgreSQL), Celery Workers, Docker Containerization, IndoBERT NLP.
Developer Tools & QA:	Git/GitHub, Linux/UNIX, Bash Scripting, Postman, Playwright Automation, Cross-Browser & Multi-Viewport QA Testing.

WORK & PROJECT EXPERIENCE

Theme & Frontend Engineer · Nozaracy Studio (Agency)

Freelance · Present | Remote

- Executed full-cycle client delivery playbooks spanning **Discovery** (Figma token mapping & component architecture), **Implementation** (bespoke WordPress PHP & Shopify Liquid themes), **QA**, and **Final Audit**.
- Engineered custom WordPress and Shopify themes from scratch with 0% page-builder bloat, guaranteeing clean semantic markup, modular codebases, and maintainable template structures.
- Utilized modern AI-accelerated developer pipelines for rapid component scaffolding, schema synthesis, and automated test-case generation, reducing production turn-around time.
- Conducted multi-viewport cross-browser QA and Core Web Vitals performance tuning, consistently achieving 90+ Lighthouse performance scores across LCP and CLS prior to client handoff.

AI Security & Autonomous Systems Architect · Zandar Platforms

2026 | Technical Project

- Architected an autonomous pentest loop with LangGraph StateGraph governing 18+ containerized security binaries (nmap, nuclei, ffuf, sqlmap) in isolated Docker environments with human-in-the-loop exploit gates.
- Implemented Amazon Bedrock multi-model cost routing (DeepSeek, Claude, Qwen) paired with a 3-tier GraphRAG memory architecture (Qdrant vector + Neo4j knowledge graph + PostgreSQL episodic).
- Engineered an autonomous 4-graph OSINT intelligence pipeline powered by Celery workers, 26 multi-tier collection adapters, fine-tuned IndoBERT (0.894 F1 score on NusaX), and geospatial analytics.

Enterprise Infrastructure & IT Support Technician · PT Sangsaka Surya Karunia 2020 – 2021 | Yogyakarta, Indonesia

- Delivered enterprise-level hardware support, computer diagnostics, component upgrades, and preventive maintenance across office workstations and networked peripherals.
- Managed local office network infrastructure, configuring multi-VLAN switching, troubleshooting packet drops, and resolving physical/logical connectivity issues to ensure 99%+ uptime.
- Handled daily helpdesk incident tickets and supported administrative personnel with mission-critical system configurations and software reliability.

Member of Cybersecurity Division · HIMMTEK Universitas AMIKOM Yogyakarta 2024 – 2025 | Yogyakarta, Indonesia

- Active member of the Computer Engineering Student Association (HIMMTEK) Cybersecurity Division (SK: 1337/S-KMHS/AMIKOM/VI/2025 issued by Direktur Kemahasiswaan).
- Organized internal security workshops, studied attack vectors, and participated in collegiate CTF challenge training sessions.

VERIFIED CERTIFICATIONS & NATIONAL HONORS

2nd Place — Networking Competition ★ National
Digination Fest 2024 · Dirkominfo PPI Dunia (Team Netanet)
`CERT: 081/CERTIFICATE/PPID-KOMINFO/V/2024`

Cisco Network Security Certified • Cisco
Cisco Networking Academy · ASA, IPsec VPN, AAA, Zone Firewall
`CREDENTIAL ID: 22.83.0886 · Issued: Jan 12, 2026`

Cisco CCNA 3: ENSA • Cisco
Enterprise Networking, Security, & Automation (v7 Curriculum)
`OSPFv2 · WAN QoS · Network Automation · Oct 2024`

Cisco CCNA 2: SRWE • Cisco
Switching, Routing, & Wireless Essentials (v7 Curriculum)
`VLANs · Inter-VLAN · EtherChannel · Feb 2024`

Cisco CCNA 1: ITN • Cisco
Introduction to Networks (v7 Curriculum) · OSI & TCP/IP
`IPv4 / IPv6 Architecture · Subnetting · Feb 2024`

Amikom English Proficiency (TOEFL: 453) • Intermediate
Universitas AMIKOM Yogyakarta · Reading: 32, Struct: 16, List: 24
`ID: #AEPT092611555 · Sept 2026 · Valid until Sept 2027`
